JOURNAL OF COMPUTATIONAL AND APPLIED MATHEMATICS

Volume 128, Numbers 1–2, 1 March 2001

Contents

Preface ix

V. Thomée
From finite differences to finite elements. A short history of numerical analysis of partial differential equations 1

B. Bialecki and G. Fairweather
Orthogonal spline collocation methods for partial differential equations 55

D. Gottlieb and J.S. Hesthaven
Spectral methods for hyperbolic problems 83

W. Dahmen
Wavelet methods for PDEs — some recent developments 133

B. Cockburn
Devising discontinuous Galerkin methods for non-linear hyperbolic conservation laws 187

R. Rannacher
Adaptive Galerkin finite element methods for partial differential equations 205

M. Suri
The *p* and *hp* finite element method for problems on thin domains 235

D. Silvester, H. Elman, D. Kay and A. Wathen
Efficient preconditioning of the linearized Navier–Stokes equations for incompressible flow 261

K. Stüben
A review of algebraic multigrid 281

P. Wesseling and C.W. Oosterlee
Geometric multigrid with applications to computational fluid dynamics 311

0377-0427/01/$ - see front matter © 2001 Elsevier Science B.V. All rights reserved.
PII: S0377-0427(01)00351-X

J. Xu
The method of subspace corrections 335

M.J. Baines
Moving finite element, least squares, and finite volume approximations of steady and time-dependent PDEs in multidimensions 363

W. Huang and R.D. Russell
Adaptive mesh movement — the MMPDE approach and its applications 383

C.J. Budd and M.D. Piggott
The geometric integration of scale-invariant ordinary and partial differential equations 399

R.E. Ewing and H. Wang
A summary of numerical methods for time-dependent advection-dominated partial differential equations 423

P.J. van der Houwen and B.P. Sommeijer
Approximate factorization for time-dependent partial differential equations 447
